

IP65 Retro-Reflective Photocell Installation Instructions

IP65 Retro-Reflective Photocell

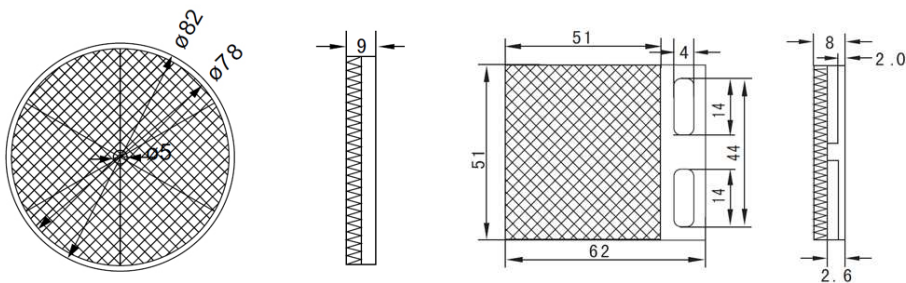

Features

1. Non-sphere optical lens totally eliminate stray light and overcome the interference from such light sources as sunlight.
2. Built-in LED light source makes installation easy.
3. Able to detect working status by power LED indicator and output LED indicator.

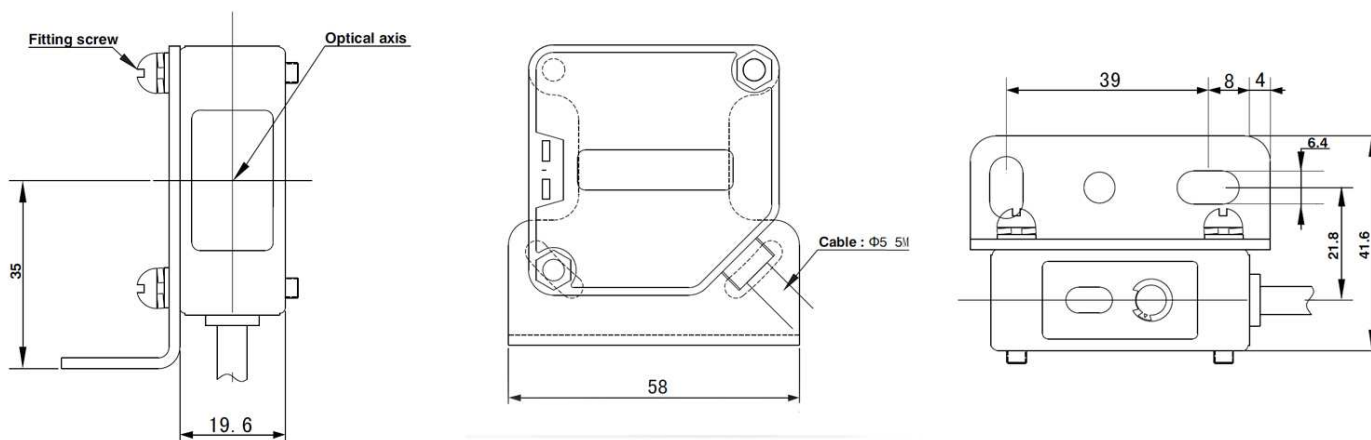

Installation Instructions

1. Mount the reflector and the sensor in the required positions.
2. Ensure potentiometer is set to D.ON..
3. Follow wiring instructions as detailed in Figure 1.
