## SPECIFICATION

Combining a specially designed lockcase with a marine grade keypad, the BL3080 'Mini' gate lock series is designed for metal box section gates. With a reversible push/ pull pad built into the unit, this allows quick exit from the premises.

The BL3080 'Mini' gate lock comes with a concealed 'on the door' code change button, allowing quick a quick and easy code change without the need of removing the whole keypad. Simply take off the shield concealing the code change button and

This lock is suitable for 40-60mm gates and comes with two M8 bolt fixings and an adaptor plate designed to retro-fit 140mm locks. Fully reversible on site and coated in a specialist e-plating for complete external use, it's designed for harsh conditions and for most styles of metal box section gate.
